# Day Scheduling Rule Checks

What the Check Rules feature validates for a day's appointment schedule

### 1. New patients too early

Warns if a new patient is booked before the morning start time.

*Default: 10:00 AM*

### 2. Family members in the morning

Flags family members booked before the morning cutoff time.

*Default: 11:30 AM*

### 3. Too many family members in the morning

If a family has more than the allowed maximum all bunched in the morning, it suggests spreading across morning and afternoon.

*Default: max 3 members*

### 4. Consecutive new patients

Flags when two new patients are scheduled back-to-back without an existing (old) patient between them within the gap window. Suggests inserting an old patient in between.

*Default: 30-minute gap window*

### 5. New patients after evening cutoff

Warns if a new patient (who isn't a child, direct OPD, VIP, or BNI) is booked after the evening cutoff. Flags as an error if the patient also needs dilation.

*Default: 4:00 PM cutoff*

### 6. Consultation outside working hours

Flags consultations starting before the doctor's available time, during lunch break, or after end of day.

*Default: Starts 10:30 AM, Lunch 1:30-2:30 PM, Ends 5:30 PM*

### 7. Same family booked back-to-back

Flags if multiple members of the same family are scheduled consecutively without other patients separating them.

### 8. AT / Gonio - four sub-checks

A. Consecutive - Warns if two AT or Gonio patients are back-to-back without a non-taxing old patient between them.

B. Daily cap - Errors if AT/Gonio exceeds the daily maximum.

C. Gonio timing - Suggests scheduling Gonio in the evening.

D. AT timing - Suggests scheduling AT in the evening.

*Default: max 3/day, best after 2:30 PM*

### 9. HFA slot misuse

Flags non-HFA patients occupying the designated HFA time slots, and suggests moving HFA patients into those slots.

*Default: 9:20 AM & 9:40 AM*

### 10. ROP on wrong day

Errors if ROP patients are booked on a day other than the designated ROP day.

*Default: Wednesday*

### 11. Laser on wrong day

Errors if laser patients are booked on a day other than designated laser days, unless the patient is SVV-advised.

*Default: Tuesday, Friday*

### 12. Wheelchair timing

Suggests scheduling wheelchair patients in early morning or evening rather than mid-day.

*Default: before 10:00 AM or after 4:00 PM*

### 13. Laser duration gap

Warns if a laser consultation doesn't have enough gap before the next patient's consultation.

*Default: 20 minutes*

*All rules can be individually toggled ON/OFF and configured in Settings > Check Rules Configuration.*
